

ARCONAS®

Innovative Leader in Seating

setz™ bariatric

- Rugged construction and solid performance
- Post and beam steel construction ensures strength and stability.
 - Ergonomically contoured seat pans are perforated steel.
 - Bariatric single seat unit available in 30" width.
 - Standard units available in 2 - 5 seat units, back-to-back units, benches, end tables and optional arms are also available.
 - Freestanding or floor mounted options are available.
 - Minimal floor contact points allow for easy floor maintenance and clear sightlines for security personnel.
 - Units may be connected to form continuous rows of seats.
 - Glides and end caps are nylon.
 - Designed for indoor and outdoor use.

Finishes

- Steel components are powder coated.
- Zinc plated undercoat is required for outdoor applications.
- Clear topcoat recommended over some metallic finishes.

Upholstery

- Available with seat and back pads (shown above) or without.
- Upholstered back and seat pads are easily removed and replaced on-site.
- Upholstery options include: vinyl, faux leather, leather and woven textiles.
- Embroidery options on seat backs include: sponsorship and corporate logos and accessibility symbols.
