

Multi Purpose Screening

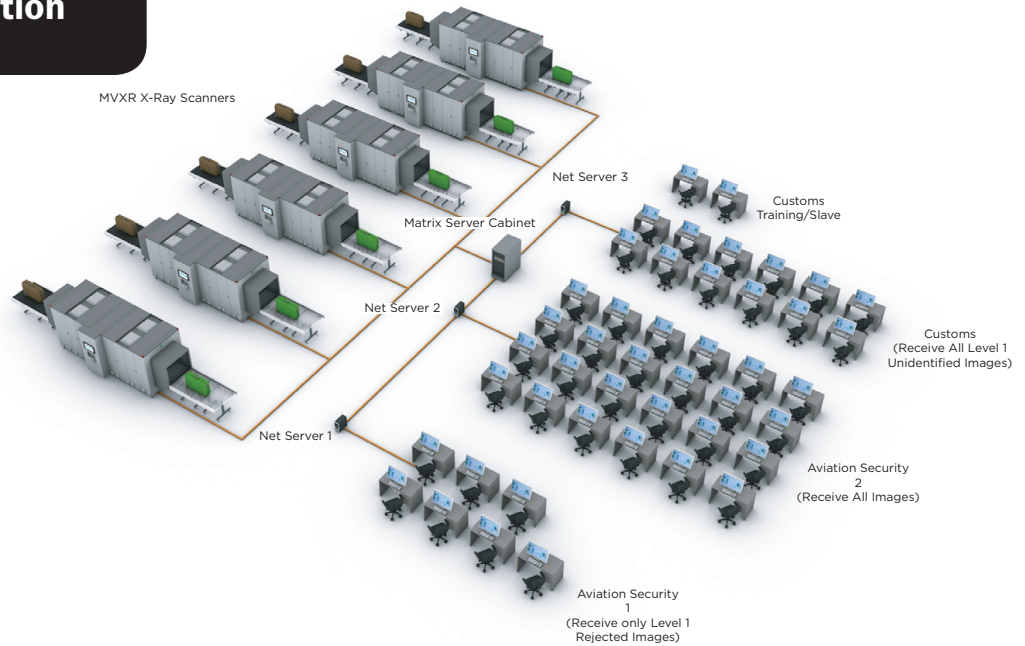

Automatic Detection

High Throughput Operation

RAPISCAN COMPLEX CUSTOMS

The Rapiscan MVXR5000 high quality imaging increases the ability to detect contraband.

RAPISCAN

COMPLEX CUSTOMS

With the Complex Customs configuration and the Rapiscan MVXR5000, distributing data in the hold baggage screening area for evaluation by multiple agencies is made possible.

With our proprietary Complex Customs feature set an MVXR network distributes screening data to multiple screening workgroups sharing the same MVXR scanning equipment. This allows different business units to make independent detection decisions on the same stream of scanned items and saves infrastructure and operational costs for both the airport and the customs agency.

High Quality Detection Capabilities

When looking for threats or contraband, with true multi-view pseudo 3D, 5 high quality views available to the operator and Rapiscan's proprietary image enhancement feature, Crystal Clear, MVXR5000 offers sophisticated tools for detection.

Low Cost Infrastructure and Operations

By implementing a Rapiscan MVXR Complex Customs configuration, separate agencies can share resources, saving on infrastructure and operations costs. Because the MVXR5000 fits most baggage handling systems, integrating with current equipment is possible.

User-Friendly

The Complex Customs configuration is user-friendly allowing for better security and customs operator training.

Comprehensive Reporting Tools

With built-in comprehensive operational statistics, powerful reports are available to manage the Complex Customs configuration.

Rapiscan[®]
systems

An OSI Systems Company

THE WORLD'S LEADER FOR EFFICIENT, EFFECTIVE SECURITY

Rapiscan Systems is the global security solutions provider of choice to governments and companies worldwide with over 70,000 systems deployed in over 100 countries. Rapiscan Systems is an ISO 9001:2008 certified company. Rapiscan products have received certifications from government agencies including the European Civil Aviation Conference (ECAC), the U.S. Transportation Security Administration (TSA), and the UK Department for Transport (DfT). All Rapiscan products are backed by a worldwide training, maintenance and service organization which is available to customers 24/7.

Rapiscan[®] systems

An OSI Systems Company

TESTED AND CERTIFIED SECURITY SOLUTIONS

An ISO 9001:2008 certified company, Rapiscan Systems submits its products to rigorous certification and testing bodies, including:

SAFETY ACT
