Rapiscan MobileCheck IRC
Personnel Screening Container

The Rapiscan MobileCheck™ IRC is a mobile, easily deployable, integrated personnel security solution for critical checkpoints where safety of security personnel is vital. This remotely operated non-intrusive baggage and people screening solution is housed in a standard 20 ft. container with the state of the art systems to detect threats, explosives, nuclear material and weapons. Rapiscan's globally certified and approved 620XR with superior X-ray image quality is utilized for baggage and small parcel screening. Secure 1000 Dual Pose is an advanced backscatter X-ray whole body imaging system for identification of weapons and contrabands on and under the person's clothing - regardless of the material composition of threat. Also included is a Nuclear Radiation detector capable of identifying any nuclear material carried either on the body or in the carry-on baggage.

The Integrated Re-locatable Checkpoint (IRC) system consists of two containers. The Personnel Screening Container (PSC) is the portal where all the security inspection systems are housed and screening of people and their belonging takes place. The Remote Operator Station (ROS) contains the operators, hardware and all the equipment necessary to operate the PSC remotely.

CUSTOMER SUPPORT SERVICES

Our team is dedicated to providing a prompt, effective and personalized response that exceeds your expectations. With spare parts inventory and skilled technicians all over the world, you can be certain Rapiscan Systems will always be prepared with a solution to address your requirements. By measuring response time, parts delivery and support status, our team embraces a customer focused philosophy to ensure continual improvement in customer support, products and services.

System Highlights

Rapiscan 620XR

(Specification available upon request)

Accepted for use by global Aviation authorities, the Rapiscan 620XR with a 620 mm (24.4 inches) wide by 420 mm (16.5 inches) high tunnel opening and bi-directional operation provides outstanding image quality and threat detection. Rapiscan 620XR's OS600 software provides an intuitive GUI with advanced networking capabilities, Target™, Threat Image Projection (TIP), Operator Training Program (OTP) and Density Threshold Alert (DTA).

Rapiscan Secure 1000® Dual Pose

(Specification available upon request)

The Rapiscan Secure 1000® is the most effective and most widely deployed image-based people screening solution. The Secure 1000 produces high resolution images that enable the operator to easily identify concealed threat and contraband items. The Rapiscan Secure 1000 is ideal for high security environments because both organic (e.g. solid and liquid explosives, narcotics, ceramic weapons) and inorganic (e.g. metal) materials are apparent in the image.

BAGGAGE AND PARCEL INSPECTION

PERSONNEL SCREENING CONTAINER COMPONENTS

One (1) 620XR – 620 mm Wide x 420 mm High, Baggage and Parcel Inspection system

One (1) Secure 1000 Dual Pose – Backscatter X-ray Whole Body Imaging System

One (1) Gamma Radiation Detector

One (1) One meter Roller Table for 620XR

Three (3) CCTV Cameras

Other Accessories
